

# Keeping the Home Safe from Coronavirus

Family members are encouraged to...

## All households

- Clean hands at the door and at regular intervals
- Create habits and reminders to avoid touching their faces and cover coughs and sneezes
- Disinfect surfaces like doorknobs, tables, desks and handrails regularly
- Increase ventilation by opening windows or adjusting air conditioning
- Disinfect their mobile phones regularly

## Households with sick family members

- Give sick members their own room if possible, and keep the door closed
- Have only one family member care for them
- Consider providing additional protection or more intensive care for household members over 60 years old or with underlying conditions

Coronavirus is deadly, but we shouldn't panic. Please stay calm and wash your hands regularly.
