Forward looking statements

Certain statements in this document constitute “forward looking statements” within the meaning of Section 27A of the US Securities Act of 1933 and Section 21E of the US Securities Exchange Act of 1934.

In particular, the forward looking statements in this document include among others those relating to the Damang Exploration Target Statement; the Far Southeast Exploration Target Statement; commodity prices; demand for gold and other metals and minerals; interest rate expectations; exploration and production costs; levels of expected production; Gold Fields’ growth pipeline; levels and expected benefits of current and planned capital expenditures; future reserve, resource and other mineralisation levels; and the extent of cost efficiencies and savings to be achieved. Such forward looking statements involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of the company to be materially different from the future results, performance or achievements expressed or implied by such forward looking statements. Such risks, uncertainties and other important factors include among others: economic, business and political conditions in South Africa, Ghana, Australia, Peru and elsewhere; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions, exploration and development activities; decreases in the market price of gold and/or copper; hazards associated with underground and surface gold mining; labour disruptions; availability terms and deployment of capital or credit; changes in government regulations, particularly taxation and environmental regulations; and new legislation affecting mining and mineral rights; changes in exchange rates; currency devaluations; the availability and cost of raw and finished materials; the cost of energy and water; inflation and other macro-economic factors, industrial action, temporary stoppages of mines for safety and unplanned maintenance reasons; and the impact of the AIDS and other occupational health risks experienced by Gold Fields’ employees.

These forward looking statements speak only as of the date of this document. Gold Fields undertakes no obligation to update publicly or release any revisions to these forward looking statements to reflect events or circumstances after the date of this document or to reflect the occurrence of unanticipated events.
Salient features

**Q4 2014**

- Attributable production: 556koz
- Normalised earnings: US$17m
- Net cash flow*: US$54m

**Full year 2014**

- Attributable production: 2.22Moz
- AISC: US$1,053/oz (excl. South Deep: US$1,000/oz)
- Normalised earnings: US$85m
- Net cash flow*: US$235m

- Beat group guidance for 2014 in terms of production and costs
- Strong performances from Australia (>1 Moz), Ghana and Peru
- South Deep had a challenging 2014 – need to get basics right
- Successful year in terms of non-core asset sales
- Strong cash generation benefits balance sheet and dividends
- Delivery into strategy continued

* Cash flow from operating activities less net capital expenditure and environmental payments for continuing operations
The Transformation of Gold Fields

**Strategic Imperatives**

1. **Focus on Free Cash Flow**
   - Structural shift in cost base
   - >15% free cash flow margin at a US$1,300/oz gold price
   - No marginal mining and high-grading, maintain cut-off grades
   - Protect sustainability of ore bodies by investing in development and stripping

2. **A new growth paradigm**
   - Focus on growing the margin, not ounces
   - Opportunistic acquisitions
   - Focus on brownfields exploration
   - No greenfields exploration
   - Divest non-core projects and exploration portfolio

3. **Strengthen balance sheet**

4. **Pay dividends**

5. **Deliver South Deep**

---

Focus On Total Shareholder Returns
How we scored on key deliverables in 2014

- **Production**: Cost Control & 15% FCF Margin @ US$1,300/oz
- **Safety**: Increased momentum at South Deep
- **Pay Dividends**: Reduce net debt by $200m in 2014
- **Disposal of non-core assets**:
AIC down 35% from US$1,621/oz (Q4 2012) to US$1,047/oz (Q4 2014)
The Transformation of Gold Fields

Net Cash Flow

1 Net cash flow from operating activities after taking account of net capital expenditure, environmental payments, debt service costs and non-recurring items.

US$468 million Swing in Net Cash Generation YoY Despite 10% Drop In Gold Price
The Transformation of Gold Fields

Strengthening of the Balance Sheet

- Net debt reduced by US$282m to US$1,453m
- Net debt to EBITDA reduced to 1.3x
- Maturity date on US$715m of debt extended, on same terms, from Nov 2015 to Nov 2017
- Targeting net debt to EBITDA of 1.0x by 2016

1 12-month to December 2014 EBITDA

Targeting Net Debt to EBITDA of 1.0x
The Transformation of Gold Fields

Utilisation of Cash

A Dividend-first Policy

- H1 2014 Dividend: R0.20 per share
- H2 2014 Dividend: R0.20 per share
- Total 2014 Dividend: R0.40 per share

Maintaining Dividend Policy Of Paying Out 25% To 35% Of Normalised Earnings
SOUTH DEEP:
Finding its feet
South Deep

• 2014 heavily impacted by 4-month ground support programme
• Knock-on effects into 2015
• Introduction of South African management team accelerated
• Need to get the basics right – will take longer than anticipated
• Development recommenced on 100 and 105-levels
• Focus on reducing cash burn in 2015

2015 Guidance
• Production: 228koz
• AISC: ~US$1,400/oz
• AIC: ~US$1,470/oz
• Exchange rate ZAR11.50 = US$1.00

Targeting breakeven in 2016
South Deep

2014 Intervention

- **People Strategy**
  - Short term
    - Rightsizing of workforce through voluntary separation process
  - Medium term
    - Recruit South African Team from limited pool of skills
  - Long term
    - Grow South African skills pool through bespoke mechanised mining training

- **Fleet Availability and Utilisation**
  - Decongest the mine
  - Cat A equipment reduced from 126 to 75
  - Fast-track Mega Workshop on 93-level
  - Upgrade satellite workshops
  - Replace key equipment

- **Ore handling infrastructure**
  - Fast-tracked additional ore passes and other key infrastructure

Costs and Capital Reduced from ~R5 Billion to ~R4 Billion Despite Ground Support
South Deep

Safety Related Ground Support Intervention

- Growing momentum in H1 2014 interrupted in May
- Four-month suspension of production for ground support in 2014
- Knock-on effects into 2015
  - Destress
  - Long-hole open stopes delayed

Acceleration of Medium Term People Strategy

- Medium and long-term people strategy accelerated
  - Recruiting South African leadership skills
  - Growing the South African skills pool
- Introduction of new team under Nico Muller
- Australian Team downscaled – key role in skills transfer and training

70% of Production Areas Curtailed For Four Months
The Way Forward: Short-term Objectives

- **Address the skills shortage**
  - Internal skills development deemed an imperative

- **Stop the cash burn**
  - Move to break-even in 2016
  - Optimise entire mine
  - No more major capital required
    - ZAR1.7bn project capital remaining from original budget - to be spent over the next 10 years

- **Fix the base**
  - People
  - Equipment
  - Safety
    - Instil discipline of “first pass” support protocol

- **Leverage high operational gearing**
  - Full production costs mostly in the system
  - Every incremental ounce direct to the bottom line
INTERNATIONAL OPERATIONS REVIEW:
Strong performance across portfolio
Solid international portfolio

All regions generating cash at current gold price

![Graphs showing production (koz) and AIC (US$/oz) for Australia, Ghana, and Peru for Q4 2013, Q1 2014, Q2 2014, Q3 2014, and Q4 2014.](image)
St Ives

**2015 Guidance**

- Production: 350koz
- AISC & AIC: ~US$1,040/oz
- Exchange rate: US$0.80 = A$1.00

**Significant Reduction In Cost Base**

• Improved quarter, with production up 5% and AIC down 25%

• Challenging year - impacted by two abnormal rain events in Q1 2014 and resource model downgrades

• Remained cash flow positive despite setbacks

• Focus on stripping and commencing production from Invincible in early 2015
  - 4.7Mt @ 4.0g/t – adding 544koz over a 4-year life

• Increase in brownfield exploration spending to enhance the long-term future of the mine

**Q4 2014 and FY14 Results | Nick Holland | 12 February 2015**
St Ives – Project Generation: Highly Prospective Corridor

**Speedway Corridor Exploration Targets**

- Poorly Explored Trend
- Proven to be Able to Deliver Major Deposits
- Multiple Programmes Undertaken at all Milestone Levels (1-4)
- Evidence of Gold Along 22km Strike Length
- Rigorous Staged Exploration Programmes to Ascertain Potential
- SKIMPI and GMag Used to Define Bedrock Structure
- Multi-elements to Determine Rock Types & Anomalism
- Looking for the next Invincible
Steady Performance From Agnew/Lawlers

Q4 2014 and FY14 Results | Nick Holland | 12 February 2015

19

Steady Performance From Agnew/Lawlers

• Strong quarter rounds off a good year
• 2014 cost and production guidance exceeded
• 2015 focus on accessing FBH – core reserve replacement
  ▪ Potential high grade opportunity
  ▪ FBH-Link Probable Reserve: 1.19Mt @ 9.1 g/t for 348koz

2015 Guidance
• Production 260koz
• AISC & AIC: ~US$950/oz
• Exchange rate US$0.80 = A$1.00
Agnew – Waroonga Maintains High Potential Extensional Opportunities

Robust Reserve Secured at FBH-Link – Additional Targets to be Tested in 2015

Waroonga Complex

Exploration Spaces - Additional Potential 2015

FBH-Link Probable Reserve: 1.19Mt at 9.1 g/t for 348 koz
Darlot

- Despite a difficult Q4 2014, exceeded production targets for the year
- Remains in a challenged position
- A$8.3m spent on exploration, but remained cash flow positive
- Plan to increase drilling on the CDA deposit in 2015 to find a potential ‘game-changer’ for Darlot

2015 Guidance
- Production: 580koz
- AISC & AIC: ~US$1,040/oz

A World Class Mine

Q4 2014 and FY14 Results | Nick Holland | 12 February 2015
**Damang**

- Excellent quarter – evidence of success of turnaround plan
- 2014 production and cost guidance exceeded
- 2015 focus remains on quality selective mining and plant optimisation
- Work to increase reserves and mine life continues
- Negotiations on stability agreement underway

---

### 2015 Guidance

- Production: 180koz
- AISC & AIC: ~US$1,220/oz

- Q3 2014: 42.8 US$/oz
- Q4 2014: 47.8 US$/oz
Exploration Projects for 2015

- Exploration program tailored to fit Damang’s turnaround strategy
- Replace and grow reserves by extensions to active pits and known ore deposits
- Exploration to target hydrothermal prospects due to their generally higher gold grades
- Exploration to prioritize targets in the proximity of the Mine’s Plant
- Targeting reserve replacement at <US$50 / reserve ounce in 2015
- Juno-Nyame-Tamang trend highly prospective
- Juno to Amoanda South ~10km prime strike length to be fully explored
Cerro Corona

- Beat 2014 gold and copper production and cost guidance
- Steady, consistent performer
- 2015 increase in capex – extensions to tailings and waste storage capacity
- Long-life, quality asset

2015 Guidance
- Production AU eq: 280koz
  - AISC & AIC: ~US$915/oz AU equivalent
- Production AU only: 147koz
  - AISC & AIC: ~US$800/oz

Production (koz) and AIC (US$/oz)
Conclusions

Group 2015 Guidance

- Attributable production (gold equivalent): 2.20Moz
- AISC: US$1,055/oz
- AIC: US$1,075/oz
- Exchange rates: ZAR11.50 = US$1.00; US$0.80 = A$1.00

Five Strategic Priorities

- South Deep – The top priority
- Cash flow and margin – Make money at current prices
- Dividends – Pay between 25% and 35% of earnings
- Balance sheet – Targeting 1.0x net debt to EBITDA by 2016
- Growth – Brownfields exploration and opportunistic, value-accretive acquisitions
