value
for a
sustainable
future

GRI CONTENT INDEX FOR THE INTEGRATED ANNUAL REPORT 2019

Our materiality analysis identifies significant economic, environmental, social and governance factors that could substantively influence the decisions of shareholders and stakeholders regarding our ability to deliver our strategic objectives and value creation over the short, medium and long term. Gold Fields conducts a materiality analysis every year. This year we established a Materiality Assessment Steering Committee and focused our analysis on reconfirming the scope and boundaries of the analysis, recognising the changing footprint of our business. We also confirmed that our sustainability focused topics include economic, environmental, social and governance factors. Furthermore, we reconstructed our topics used for the materiality analysis from over 20 different internal and external sources of sustainability priorities relevant to our business. These included the ICMM 10 Principles and eight Position Statements, GRI Mining and Metals Sector Supplement, UN Global Compact 10 Principles, investor environment, social and governance (ESG) focus areas, Gold Fields strategic priorities, internal risk management outcomes, external stakeholder engagement outcomes, United Nations Global Compact UNGC ten principles etc.

From this pool of sustainability topics, we identified 54 potentially material topics, which we analysed further in order to prioritise and rank material topics. This resulted in 14 material topics and an additional six relevant topics for Gold Fields. A significant change and improvement in our 2019 analysis has been the prioritisation and ranking of material topics that are most important to Gold Fields, and those which are most important to our stakeholders. In identifying topics most important to our stakeholders, we utilised feedback from some of our routine engagements and materiality assessment interviews undertaken with stakeholders across our business in 2018. This was supplemented with additional interviews undertaken in 2019 and early 2020. As part of our materiality assessment and external stakeholder interviews, we have identified an opportunity to diversify our external stakeholder engagement and further strengthen our diversity in materiality assessment interviews. The graphic below represents the outcomes of the 2019 materiality assessment.

Material matters to Gold Fields and its stakeholders

		201-4 Significant assistance received from government	This GRI Content Index	6, 10		Gold Fields did not receive any financial support from government in 2019.
	GRI 202: Market presence	GRI 103: Management approach 2018 103-1 – 103-3 Explanation of the material topic and its boundaries; the management approach and its components; evaluation of the management approach; explanation of the material topic and its boundaries	This GRI Content Index https://www.goldfields.com/sustainability.php https://www.goldfields.com/operations.php Our business pgs 3 – 5 Gold Fields 2019 Sustainability Performance Tables – Diversity and Equal Opportunity Materiality topics pg 13			Gold Fields has adopted a regionalisation model. This requires the regions to operate autonomously, with corporate providing technical, governance and compliance oversight. The regions have developed fit-for-purpose structures to ensure the current and future skills profiles are sufficient in order to meet the business requirements. To this end, Gold Fields' attraction policy is to recruit nationals, with emphasis placed on attracting skills from the communities surrounding the mines. Market assessments are conducted on a regular basis to ascertain the level and pool of skills in country. Gold Fields partners with various academic institutions in the regions within which it operates to ensure there is a sufficient pipeline of skills to meet the current and future needs of the business. Gold Fields participates in national employee climate surveys to position itself as an employer of choice in the various countries. Training and development initiatives have also been implemented in local communities to enhance skill levels. Gold Fields participates in annual salary surveys in each jurisdiction to ensure that the remuneration strategy, which includes pay and employee benefits, remains competitive. Approximately 95% of Gold Fields employees are nationals.

	GRI 412: Human rights assessment 	GRI 103: Management approach 2018 103-1 – 103-3 Explanation of the material topic and its boundaries; the management approach and its components; evaluation of the management approach; explanation of the material topic and its boundaries	Human rights, pgs 86 – 87 Gold Fields 2019 Sustainability Performance Tables – Community grievances			Human rights among our workforce Gold Fields upholds the highest standards of human rights within its workforce, including: freedom from child labour; freedom from forced or compulsory labour; freedom from discrimination (subject to considerations of affirming previously disadvantaged groups); and freedom of association and collective bargaining. All induction training (including that provided by the Gold Fields Internal Protection Services team) includes key human rights elements, and the Company's internal grievance mechanisms help ensure employees and contractors can raise human rights concerns. All grievances are handled by the Gold Fields Human Resources function, in consultation with legal teams for human rights concerns, which uses a defined process to record, evaluate and address legitimate complaints. Employees can also raise concerns via independent counsellors as part of the Gold Fields Employee Assistance Programme. All our operations are assured against the World Gold Council's Conflict-Free Gold Standard, which ensures that none of our gold is used to finance armed conflict, serious abuses of human rights or breaches of international law. Gold Fields runs a human rights campaign on Human Rights Day to raise awareness of these issues.
		412-1 Operations that have been subject to human rights reviews or impact assessments	This GRI Content Index Human rights, pgs 86 – 87	1, 2	3	Environmental and Social Impact Assessments, which assess the impacts and potential impacts of our operations and potential projects on local communities and other stakeholders, have been undertaken by all operations. The assessments include human rights aspects but are not formally HRIAs. Risk assessments are undertaken on an ongoing basis and grievance mechanisms are in place at the operations to record, address and respond to social, environmental and human rights grievances.
		412-2 Employee training on human rights policies or procedures	Human rights, pgs 86 – 87	1, 2, 3, 4, 5	1, 3	100%. All new employees are required to sign the Code of Conduct and high level awareness training in induction. Code of Conduct eLearning is mandatory for all employees. In 2017 a Code of Conduct eLearning-module was launched for all employees and continued into 2018/19. The Code of Conduct eLearning-module continues to be run for all employees to educate them on ethical practices.

All operations are implementing community relations and stakeholder engagement strategies and implementation plans. All regions are implementing host community procurement and employment plans with targets in line with Group guidance published in 2019.</p>
		413-2 Operations with significant potential or actual negative impacts on local communities	<p>This GRI Content Index</p> <p>Responsible stewardship of the environment pgs 67 – 74</p> <p>Measuring our impacts and relationships pgs 81 – 84</p> <p>Human rights pgs 86 – 87</p> <p>Gold Fields 2019 Sustainability Performance Tables – Community grievances, Environment</p> <p>Regional SD Reports 2019 https://www.goldfields.com/integrated-annual-reports.php</p>	1, 2	1, 2, 3, 4, 9, 10	<p>In 2018, a process solution seeped through a section of the wall of the Far East Tailing Storage Facility (FETSF) at the Damang mine. The incident was immediately addressed at the operational level. Management together with community leaders of the adjoining community subsequently agreed to a three-year livelihood enhancement programme for the community. The programme included the construction of a bridge over the stream that was impacted by the seepage material, supply of agricultural inputs for cocoa farmers in the community for three years, registration of community members under the national health insurance scheme, construction of a three-unit classroom block and a community centre. Enrolment of community members on the insurance scheme and construction of the bridge had been executed, while agricultural inputs were supplied to the farmers in 2018 and 2019. The construction of the school block and the community centre have been planned for 2020.</p>

In 2018, at Tarkwa Mine, the Commission on Human Rights and Administrative Justice (CHRAJ) made recommendations following a petition brought to it (a couple of years ago) by a group of residents of the Brahabobom community who reside near the mine's Atuabo-Mantraim pits. The petition referred to blasting exceedances by the mine and asked for resettlement. CHRAJ's recommendations included the partial resettlement of the community and also asked the mine to commit to: – undertake measures that would reduce the impact of blasting; – operate within the provisions in the Minerals and Mining Regulation (L.I. 2177); and – adopt best blasting practices. Even before CHRAJ's recommendations, the mine had implemented several mitigation measures to reduce blasting impacts. Additional ones were also introduced to address the community concerns, nullify the need for resettlement, and to ensure legal compliance. The mine's position on the resettlement and the mitigation measures implemented were officially communicated to CHRAJ. In 2019, the Tarkwa mine continued the implementation of the recommendations by the Commission on Human Rights and Administrative Justice (CHRAJ) to mitigate the impacts of the mine's blasting activities on the Brahabobom community. CHRAJ constituted a 15-member joint committee on August 2019 to undertake independent monitoring of the mine's blasting activities. A total of 40 blast events were monitored by the joint committee from August 2019 to December 2019, and all the results were compliant with the Ghana Minerals Commission's standards for ground vibration and air over-pressure. The joint committee will continue its work into 2020 and submit a report to inform the final determination of the matter.

	Artisanal and small scale mining MM8	Number (and percentage) of Company operating sites on which artisanal and small-scale mining (ASM) takes place, or adjacent to the site; the associated risks and the actions taken to manage and mitigate these risks	This GRI Content Index Shared value creation in our communities pg 84 Regional SD Reports 2019 https://www.goldfields.com/integrated-annual-reports.php https://www.goldfields.com/pdf/sustainability/guidelines/community-relations-and-stakeholder-engagement/community-relations.pdf	1, 2	1, 3, 5, 9, 10	Two of our nine operations (Damang and Tarkwa) have previously had ASM operating on their concessions. This excludes our JV with Asanko. ASM has the potential to reduce the quality and quantity of the ore body and cause significant negative health, safety and environmental and social impacts. A management strategy is in place which includes patrolling of active mining areas, consultation with a range of stakeholders, negotiated eviction and prosecution, as necessary. In 2019, due to success of our management strategy and the Ghanaian government's stand against illegal mining, there was very little ASM presence on our concessions. That notwithstanding, we reviewed and updated our management strategy during 2019 with increased emphasis on proactive engagement, community job creation and protection services underpinned by the Voluntary Principles on Security and Human Rights. Refer to Gold Fields Community Relations and Stakeholder Engagement Handbook and our Community Relations and Stakeholder Engagement Guidelines, which detail our approach to ASM.

	Resettlement MM9		This GRI Content Index Asset portfolio management, pg 41 Human rights, pgs 86 – 87 Regional SD Reports 2019 https://www.goldfields.com/integrated-annual-reports.php https://www.goldfields.com/pdf/sustainability/guidelines/community-relations-and-stakeholder-engagement/community-relations.pdf	1, 2	1, 3, 5, 9, 10	<p>Ninety-one households were resettled at Damang mine in 2017. Eighty-one of the affected farmers who were earmarked for resettlement opted for cash compensation and the remaining 10 for replacement structures. The resettlement process ensured that their livelihoods were not significantly impacted.</p> <p>Impacts resulting from resettlement were predicted through the resettlement planning process in consultation with the affected migrant farmers; these included loss of structures and land and possible loss of livelihoods. Monitoring and evaluation of the resettled farmers will ensure effective integration of the farmers into the receiving community. Farmers can lodge complaints/grievances for resolution as per the mine's grievance procedure.</p> <p>In 2019, the Damang mine continued its monitoring of the 10 farmers resettled in 2017. The monitoring was to ensure that the farmers were properly integrated into the receiving community. The review of the integration process confirmed that the farmers had adapted fully to their new social environment.</p>
	GRI 414: Supplier social assessment	GRI 103: Management approach 2018 103-1 – 103-3 Explanation of the material topic and its boundaries; the management approach and its components; evaluation of the management approach; explanation of the material topic and its boundaries	This GRI Content Index https://www.goldfields.com/management-approaches.php Host community procurement and jobs in the mine value chain, pgs 82 – 83 Human rights, pgs 86 – 87			<p>Gold Fields adopted a stakeholder relationship and engagement policy statement in 2017, replacing the previous engagement policy statement. The new policy statement formalises our commitment to engaging all our stakeholders and taking a relationship approach. Increasingly, the reputational and operational risks of companies are tied to external parties that form part of a company's value chain, and Gold Fields strives to develop and maintain strong relationships with these parties built on ethics, integrity and professionalism. Gold Fields strives to develop and maintain strong relationships with companies in its supply chain built on ethics, integrity and professionalism.</p>
						<p>The Group deploys an external third-party screening solution to screen new and existing suppliers and contractors for an array of pre-defined risk categories, including workers' issues, workers' rights, human rights and related violations and/or transgressions of a socio-economic nature and extent. Risk profiles for active external suppliers and contractors with post-screen alerts are then established, risk mitigated and maintained.</p>
						<p>From a contractual point of view, all our third-party agreements contain a standard provision which requires compliance with the Gold Fields human rights policy statement. The Gold Fields Code of Conduct is also referenced in the agreements.</p> <p>In terms of the referenced ethics, integrity and professionalism pivots, Gold Fields has completed a bow-tie exercise focusing on the assessment of actual or potential human rights transgressions by suppliers and contractors. As part of the assessment, the causes for transgression, existing and required management controls, the consequences of a human rights transgression on entities and people and necessitated mitigation and damage control actions following a transgression, have been identified, reviewed and assessed across all the Gold Fields regions. With specific reference to existing and new management controls, all the regions are actively in process to review the adequacy status of existing controls and the scope and design of required new controls, based on specific in-country requirements.</p>
		414-1 Percentage of new suppliers screened using social criteria	This GRI Content Index Human rights, pgs 86 – 87	9		<p>100%</p> <p>All existing and new third parties have been screened on a monthly basis and with specific reference to the requirements of GRI 414, the criteria included workers' rights, disputes, human rights transgression, etc.</p>
